INTRO

WORLD'S FIRST BLOCKCHAINED PFP NFT WITH 'ON-MUSIC VIDEO' TRAIT AND LINK-IN-BIO SITE

- VIPSLAND GENESIS is a collection of 188,888 VIPSLAND NFTs - unique digital collectibles living on the Ethereum blockchain. VIPSLAND NFT acts as membership card, and grants access to exclusive members-only benefits,
- We offer different tiers of membership (Executive, Gold, Silver, Bronze and Normal).
- We have a micro social platform with features exclusively available for VIPSLAND members only.

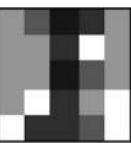

INSPIRATION

In 2022, It has been estimated the most expensive art / painting in the world is Mona Lisa. Therefore we seek to create her digital counterpart, Moonah Lisa, a word play on moon (self explanatory for all NFTs / crypto hodlrs) and moolah (slang for money), moonah therefore means moon-money.

As our NFT is blockchain based, it's natural for the art to birth other NFTs. However, subsequent NFTs creation should not be burdened by Moonah Lisa alone. We feel the NFT blockchain population should be all encompassing, therefore, referencing the other highly valued art globally with the other 3 major races, their blockchain hash values help "spawn" the other NFTs.

The four root NFTs are collectively known as "The Lisas" are inspired by Leonardo da Vinci and major popular arts in the world. Each Lisas represents certain good virtues / qualities of the general human race. All NFTs are in sizes of 32x40 pixel and lives on the persistently decentralized IPFS blockchain.

STORY OF VIPSLAND

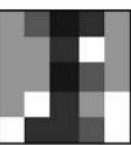

During the festive season of December 2021, while the Christmas spirit was in full swing and the weather was hot in Melbourne, Australia, Aeoum, a talented programmer and songwriter, accompanied his relatives to church. Despite not being a frequent churchgoer, he found himself struggling to tolerate the gospel music and the sweltering heat. It was then that Moses, a friend and fellow churchgoer, inspired Aeoum to create a collection of eight gospels, including the song "Genesis," which sparked the idea of developing a blockchained NFT.

Aeoum believed that all believers were important and should have a virtual space to congregate on the metaverse. He envisioned this space as an island refuge, which he aptly named VIPSLAND for the VIPs who would inhabit it. As a programmer, Aeoum contemplated the nature of creation and realized that God was the ultimate programmer, having created the genetic code that enables us to appreciate His creation.

For those who believe or know this, it is a blessing.

Aeoum drew a comparison between genetic sequencing and blockchain sequencing, recognizing that once the foundational formula and parameters were set, the resulting output would be based on those rules. He worked tirelessly to incorporate the most rudimentary human features into the coding of VIPSLAND NFTs, such as head shape, skin color, and nose shape. Through simple mathematics, calculations, and blockchain technologies, he discovered that he could generate unexpectedly unique and fascinating results, thus born the VIPSLAND NFT collection.

Each NFT was created by deriving a unique code from the parent eDNA code, which provided a thought-provoking interpretation of the phrase "In His image." Each person is special and unique, just like the one-of-a-kind NFTs derived from their eDNA code.

"One cannot exist without another."

The NFTs that follow can be traced back to their origin by the hash values of their first two characters, which must match the last character of each parent. If only one parent is available, the first two characters of the child's hash will be the same. If there is no parent available, the child is considered orphaned or adopted. The blockchained relationship between NFTs only shows the relationship between the generated NFT and its ancestors.

The difficulty of generating a new NFT depends on the number of iterations required to match the eDNA. For instance, if the difficulty level is set to nine, the blockchain algorithm will iterate nine times before finding a match for the child. All NFTs are "minted" from the eDNA of the previous parent or their descendants, and only the eDNA of children that match one or both of their parents are displayed. Thus, each NFT requires a reasonable amount of computational time.

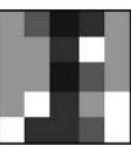

After the eDNA of the child matches the eDNA of its parents, the child's eDNA codes are used to generate its traits. By changing just one pixel in a single NFT, all subsequent NFTs can be affected, leading to a butterfly effect across all future generations.

"And in the eyes of the creator, every NFT created is good."

Aeoum, an avid art collector influenced by his parents, wondered who would be the best to birth the rest of the NFTs. He considered questions such as "What is the most expensive art in the world?" and "How can we reach for the moon?" He also prioritized racial diversity, inclusiveness, and a broad range of considerations when designing the foundation of VIPSLAND NFTs.

All of Aeoum's VIPSLAND songs were inspired by his scientifically skewed and spiritual understanding of the universe, drawing inspiration from nature, science, God, Moses, Leonardo da Vinci, and CryptoPunk NFTs. Together, these elements led to the creation of

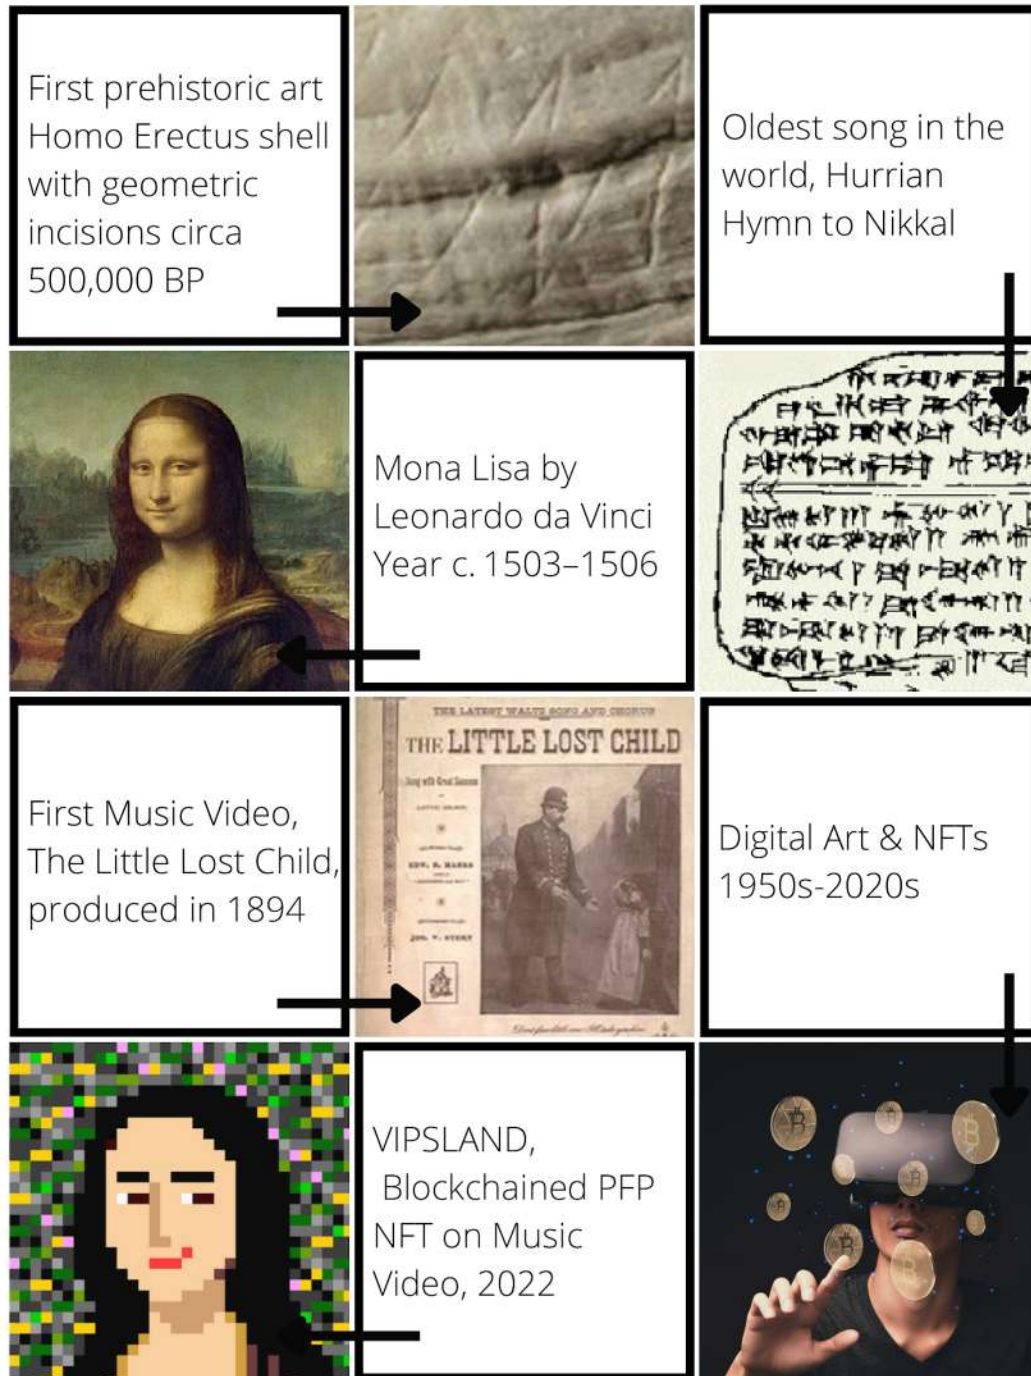

VIPSLAND, The World's First Blockchained PFP NFT with "On Music Video" trait and link-in-bio site.

BLOCKCHAINED PFP NFT

"Art" definition

- the expression or application of human creative skill and imagination, typically in a visual form such as painting or sculpture, producing works to be appreciated primarily for their beauty or emotional power.

Timeline leading to VIPSLAND creation.

PANDEMIC ERA NFT

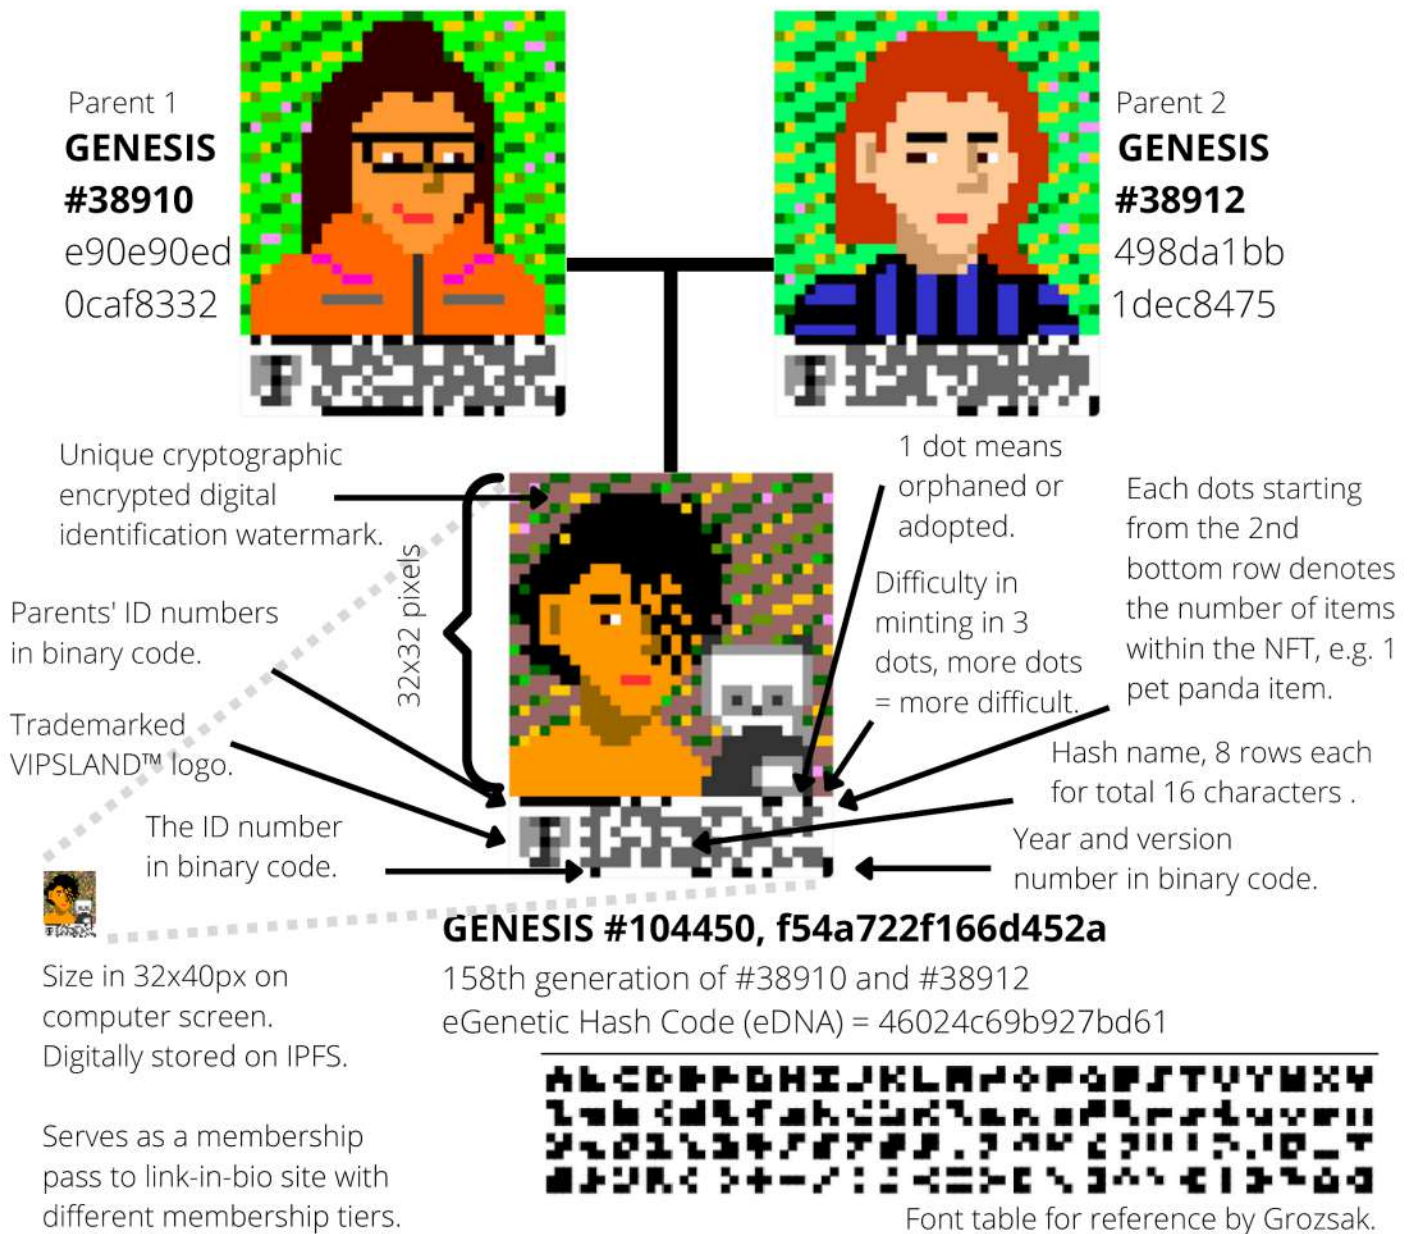

How are the unique hash names and eDNA for the NFT calculated?

Each NFT's name is a hash derived from 1024 (32x32) pixels with maximum of 216 colors each. The color codes are numbered 0 to 215, in the byte array of `[]byte{n1,n2,n3...,n1024}` where n denotes the numeric value of color codes.

```
var nft [1024]byte; hashName := fmt.Sprintf("%x",blake3(nft)[:8]);
```

The hash code is generated using the first 8 bytes of the returned blake3 algorithm, with a possibility of 1.8446744×10^{19} results, which is represented in hexadecimal value. Each of the ticket on VIPSLAND NFT has such value written below which is represented in human readable 3x3pixel font.

eGenetic Hash Code, eDNA, is the complete hash results of the total 32x40 pixel NFT art, also taking the first 8 bytes of blake3 of the pixel colour codes from bytes array in hexadecimal format. Each NFT created is 1 out of 18,446,774,073,709,551,615 possibilities. The large number is more than the grains of sand on Earth and cells in the human body.

*To put it in layman terms, the name (hash code) of the VIPSLAND NFT is the hash value of the 32x32 pixel code, whereas the eDNA of the NFT is the hash of the complete 32x40 area which includes the logo and other metadata that identifies with the 32x32 pixel profile picture (PFP) generated. **Nothing is random.***

"Everything happens within the reasons."

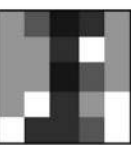

Common lineage traced to first 4 root NFTs also known as "The Lisas".

The first 4 Lisas and the traits are human designed. With the first four Lisas and their traits designs done, all resulting hashes are then derived from blockchained algorithm, making **VIPSLANDS NFTs a blockchain within the blockchain ecosystem.**

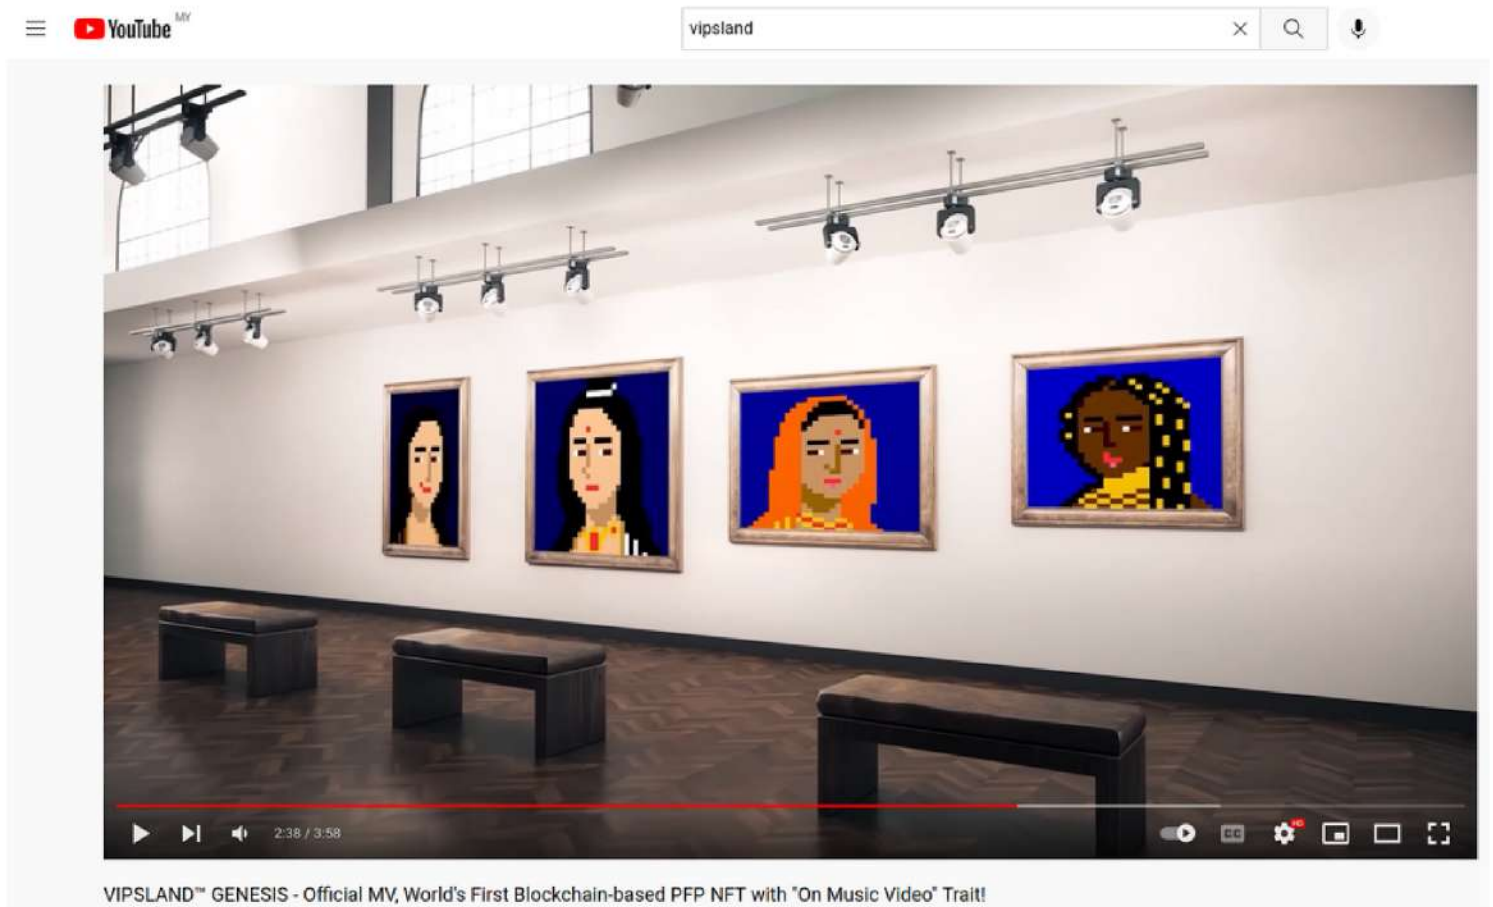

Challenges and After-thoughts

The challenges of creating this blockchain-based PFP NFT are:

- Without any reference whatsoever, everything was coded from scratch. No graphic files were used, each pixels are pure codes. (Rerunning the program generates the same unique series all the time.)
- The hair of each NFTs are different with some in front of body, some behind, some are inside their coverings and auto-adjusted accordingly.
- As they are not randomly generated, a lot of prior failed series took too long to be minted within the blockchain so had to be scrapped, this is "version 12".

GENESIS MUSIC VIDEO

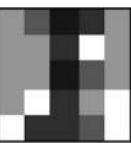

VIPSLAND™ GENESIS - Official MV, World's First Blockchain-based PFP NFT with "On Music Video" Trait!

Featuring singing Moonah Lisa

Contains 500 NFTs + 4 root NFTs with 'On Music Video' Trait at
<https://youtu.be/cuIKnXVulj8>

NFT COLLECTIONS

The Genesis Collections consists of **188,888 NFTs** offered in 2 Stages.

1st Stage Mint:

#20,001 to #160,000 in public mint sale.

ID #160,001 to #180,000 is for internal team.

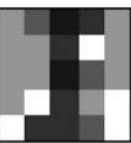

ID #180,001 to #188,888 offered as airdrop.

2nd Stage Dutch Auction:

Once 1st Stage Mint sale is completed, a random ID will be generated according to our smart contract and some even number NFTs from ID #5 to #20,000 will be distributed to the holders of matching Normal Pass NFT ID's holder.

All remaining IDs, including odd number IDs, will be sold by dutch auction.

MEMBERSHIP TIERS

Each VIPSLAND NFT is also a membership pass to VIPSLAND link-in-bio site too!
All members are related to one another through common eDNA traits.

GOLD MEMBERSHIP

Gold Privileged Pass Members will be granted first-level priority in all VIPSLAND events and higher voting rights.

To gain Gold Privileged Pass membership, ownership of at least one of the ID #5 to #200 is required.

SILVER MEMBERSHIP

VIPSLAND Silver members will have secondary access priority to all VIPSLAND events and voting rights.

To gain silver membership, ownership of at least one of the NFTs from ID #201 to #2000 is required.

BRONZE MEMBERSHIP

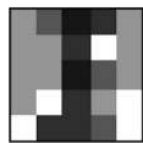

VIPSLAND Bronze members will have access to tertiary priority and voting rights.

To gain membership, ownership of at least one of the first 17,800 NFTs is required, from ID #2001 to #20000

NORMAL MEMBERSHIP

Holder of all VIPSLAND GENESIS NFT ID #20001 to #188888

UNIQUE FEATURES

WORLD'S FIRST BLOCKCHAINED PFP NFT
WITH 'ON-MUSIC VIDEO' TRAIT (AND
LINK-IN-BIO PAGE UNDER DEVELOPMENT)

'ON-MUSIC' VIDEO TRAIT

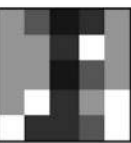

We have around 504 NFTs featured in our "Genesis" Music Video, and currently is the world's first NFT with such a trait!

<https://youtu.be/cuIKnXVulj8>

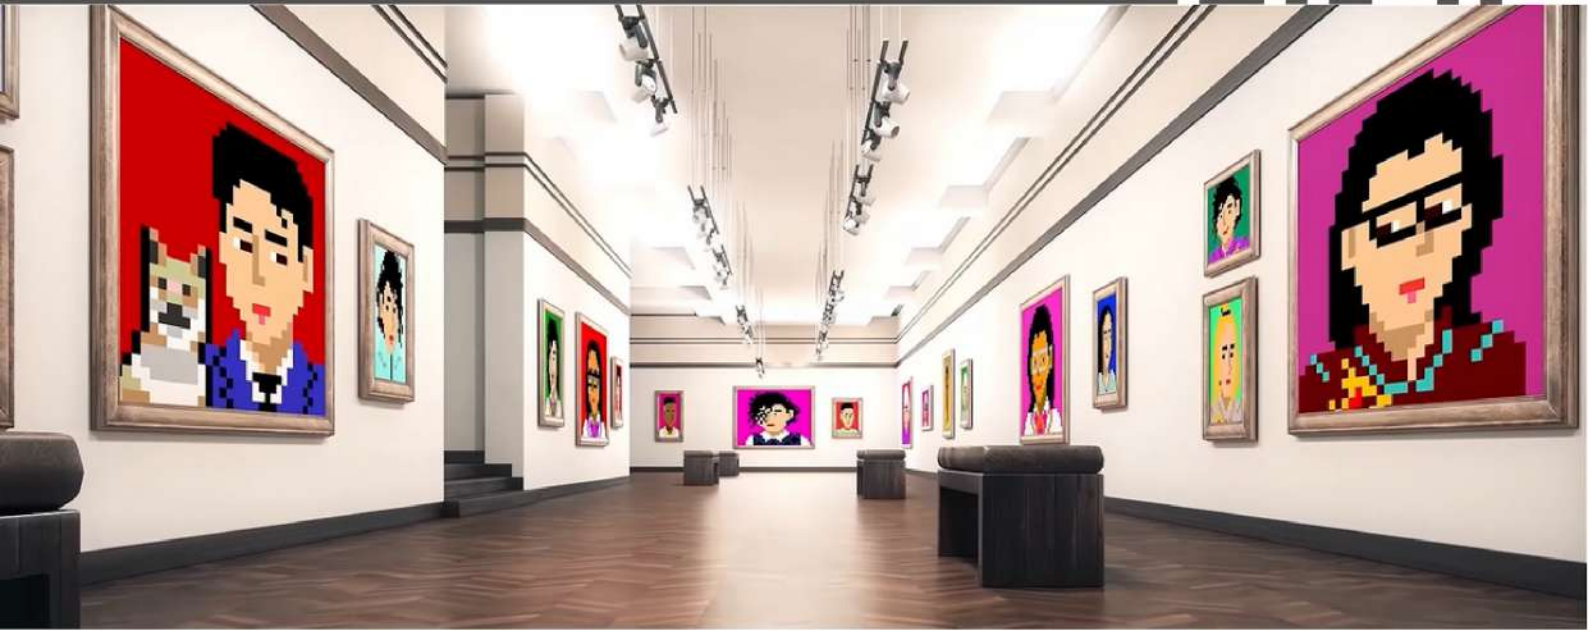

Our NFTs are designed for every wall, perfect gift to someone you care about.

BLOCKCHAINED PFP NFT WITH 250+ TRAITS

Generated with more than 250 unique traits. Our NFTs are modeled after the world population.

VIPSLAND MUSEUM

VIPSLAND seeks to have a virtual museum in one of the publicly available metaverse (to be decided once funding successfully secured).

Ground Floor

NFT exhibitions comes with Bronze Lounge area reserved for Bronze Members only.

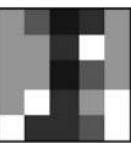

Middle Floor

NFT exhibitions with Silver Lounge area reserved for Silver Members only.

Top Floor

NFT exhibitions with Gold Lounge area reserved for Gold Members only.

Link-in-Bio Site (in construction)

All NFT owners will have access to their own personal link in bio site with access rights granted based on detection of the NFT membership tiers.

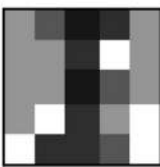

This link-in-bio site will be made available once 1st and 2nd stage sale are completed.

MERCHANDISE

VIPSLAND is trademarked. We seek to brand our merchandise and is looking for licensing opportunities to take our visions further.

Feel free to contact us for partnership opportunities from our website.

VIPSLAND, THE LAND OF VIPS

VIPSLAND is an exclusive membership club for all holders of our NFT.

Visit vipsland.com for more information!
